

# Managing Successful Programmes Practitioner Course

## About This Course

MSP is unique in its status as a generic best practice framework; generic yet flexible in application. The Registered MSP Practitioner qualification is now established as the premier programme management qualification in many parts of the world. This course is based upon the third edition of *Managing Successful Programmes* that pearcemayfield helped to author.

The course will provide you with a full and complete understanding of the MSP programme management framework that can be applied to business scenarios in preparation for work on your own programme. By the end of this course you'll be able to take the MSP Foundation and Practitioner examinations.

Following the standard syllabus issued by the MSP Examinations Board, it focuses on the MSP framework and how this might be applied pragmatically to a variety of real programmes.

## Designed for

This course is designed for practising programme managers, programme directors, programme office staff, change managers and auditors, who wish to gain formal recognition of their skills by taking the MSP Foundation and Practitioner examinations

## How you will benefit

By the end of this course you will:

- Understand the need for programme management and how the MSP framework helps effective programme management
- Understand and apply any part of the MSP process model to any programme
